Summary

BCA graduate with hands-on experience in Python, Machine Learning, Data Analysis, and backend development. Skilled in data preprocessing, exploratory data analysis, feature engineering, classification, regression, model evaluation, and building ML applications using Scikit-learn, Pandas, and FastAPI. Familiar with PyTorch and neural network fundamentals, with an interest in developing practical AI/ML solutions.

Education

Tilak Maharashtra Vidyapeeth University — Mumbai, India
Bachelor of Computer Applications (BCA) — 2023 – 2026
Overall Percentage: 80.81%

Technical Skills

Programming: Python, SQL, JavaScript
Machine Learning: Scikit-learn, Supervised Learning, Classification, Regression, Feature Engineering, Model Evaluation, Hyperparameter Tuning
Deep Learning: PyTorch, Artificial Neural Networks (ANN/FNN), Neural Network Fundamentals
Data Analysis: Pandas, NumPy, Matplotlib, Data Preprocessing, Data Cleaning, Exploratory Data Analysis (EDA)
Web Development: Django, FastAPI, REST APIs, HTML, CSS, Bootstrap
Database: MySQL
Tools: Git, GitHub, Jupyter Notebook, Google Colab, VS Code

Projects

CreditWise – Loan Approval Prediction System | *Python, Pandas, Scikit-learn, FastAPI*

- Developed an end-to-end loan approval prediction system using Python and Scikit-learn, covering data preprocessing, exploratory data analysis, feature engineering, classification, and model evaluation.
- Integrated the trained machine learning model with FastAPI to provide prediction functionality through a backend API.

Date Fruit Classification using ANN | *Python, PyTorch, Pandas, Scikit-learn*

- Developed an ANN/FNN classification model using PyTorch to classify date fruit varieties from structured data.
- Performed data preprocessing, feature scaling, model training, and evaluation to assess classification performance.

AI-Assisted Cloud Intrusion Detection | *Python, Pandas, Scikit-learn*

- Developed a Random Forest-based intrusion detection model using AWS VPC Flow Log data for classification of network activity.
- Performed data cleaning, exploratory data analysis, feature engineering, model training, and evaluation.

ICE Institute Management System – Final-Year Project | *Django, MySQL, Bootstrap*

- Developed a full-stack institute management system with student, course, attendance, quiz, notice, and digital ID card modules.
- Implemented CRUD operations, MySQL database integration, and a rule-based chatbot using Django.

Certifications

AI & Machine Learning Bootcamp – Apna College (Ongoing)
Python Programming – Primezone Classes
Full Stack Python Development – Primezone Classes
Web Development – Pride Computer Classes

Languages

English, Hindi, Marathi
